# Phase_E_Opportunities_Solutions

# TOGAF ADM - Phase E: Opportunities and Solutions

> ***Purpose**: Generate initial implementation and migration strategy*

---

## Overview

```
┌──────────────────────────────────────────────────────────────────────────┐
│                       PHASE E: OPPORTUNITIES & SOLUTIONS                 │
│                                                                          │
│   "How do we actually BUILD what we designed in Phases B, C, D?"        │
└──────────────────────────────────────────────────────────────────────────┘
```

---

## Key Activities

1. **Identify major work packages** - Bundle gaps into actionable work
2. **Group work packages into projects** - Organize related work
3. **Assess dependencies and priorities** - What comes first?
4. **Build vs Buy vs Reuse decisions** - How to implement each solution

---

## Gap to Work Package Mapping

```
┌──────────────────────────────────────────────────────────────────────────┐
│                        GAP → WORK PACKAGE MAPPING                        │
├──────────────────────────────────────────────────────────────────────────┤
│                                                                          │
│   GAP (From B, C, D)              WORK PACKAGE                          │
│   ─────────────────────           ──────────────────────                │
│   No unified player view    →     WP1: Build Player 360 Platform        │
│   Manual payment process    →     WP2: Payment Gateway Integration      │
│   Legacy monolith app       →     WP3: Migrate to Microservices         │
│   No cloud infrastructure   →     WP4: AWS Cloud Setup                  │
│   No CI/CD pipeline         →     WP5: DevOps Implementation            │
```

```
│   No real-time analytics    →     WP6: Data Platform Setup           │
│                                                                      │
└──────────────────────────────────────────────────────────────────────┘
```

---

## Work Package Definition

A **Work Package** is a bundle of related tasks needed to close a specific gap.

```
┌──────────────────────────────────────────────────────────────┐
│  WORK PACKAGE TEMPLATE                                       │
├──────────────────────────────────────────────────────────────┤
│  Name:         Payment Gateway Integration                   │
│  Gap Addressed: Manual payment processing                    │
│  Scope:        Integrate with 3 payment providers            │
│  Effort:       3 months, 5 engineers                         │
│  Dependencies: WP4 (Cloud Setup) must complete first         │
│  Business Value: Reduce transaction time by 80%              │
│  Risk:         PCI-DSS compliance requirements               │
└──────────────────────────────────────────────────────────────┘
```

---

## Grouping Work Packages into Projects

```
┌──────────────────────────────────────────────────────────────────────┐
│              WORK PACKAGES → PROJECTS GROUPING                       │
├──────────────────────────────────────────────────────────────────────┤
│                                                                      │
│  PROJECT 1: INFRASTRUCTURE MODERNIZATION                             │
│  ├── WP4: AWS Cloud Setup                                            │
│  ├── WP5: DevOps Implementation                                      │
│  └── WP7: Security & Compliance Setup                                │
│                                                                      │
│  PROJECT 2: CORE PLATFORM                                            │
│  ├── WP1: Player 360 Platform                                        │
│  ├── WP2: Payment Gateway Integration                                │
│  └── WP8: Bonus Engine Development                                   │
│                                                                      │
│  PROJECT 3: DATA & ANALYTICS                                         │
│  ├── WP6: Data Platform Setup                                        │
│  └── WP9: Reporting Dashboard                                        │
│                                                                      │
│  PROJECT 4: LEGACY MIGRATION                                         │
│  └── WP3: Migrate to Microservices                                   │
│                                                                      │
└──────────────────────────────────────────────────────────────────────┘
```

---

# Dependency Matrix

DEPENDENCY MATRIX

| | WP1 | WP2 | WP3 | WP4 | WP5 | WP6 | WP7 |
|---|---|---|---|---|---|---|---|
| WP1 | – | | | ✓ | ✓ | | ✓ |
| WP2 | ✓ | – | | ✓ | ✓ | | ✓ |
| WP3 | | | – | ✓ | ✓ | | |
| WP4 | | | | – | | | |
| WP5 | | | | ✓ | – | | |
| WP6 | ✓ | | | ✓ | ✓ | – | |
| WP7 | | | | ✓ | | | – |

```
✓ = Depends on (must be done first)

Reading: WP2 (Payment) depends on WP1, WP4, WP5, WP7
```

---

# Build vs Buy vs Reuse Decisions

```
┌──────────────────────────────────────────────────────────────────────────┐
│              PHASE E: BUILD vs BUY vs REUSE DECISIONS                    │
├──────────────────────────────────────────────────────────────────────────┤
│                                                                          │
│   FOR EACH GAP, EVALUATE SOLUTIONS:                                      │
│                                                                          │
│   ┌─────────────┐     ┌─────────────┐     ┌─────────────┐                │
│   │    BUILD    │     │     BUY     │     │    REUSE    │                │
│   │   Custom    │     │   Product   │     │  Existing   │                │
│   │ Development │     │   / SaaS    │     │   Assets    │                │
│   └─────────────┘     └─────────────┘     └─────────────┘                │
│                                                                          │
└──────────────────────────────────────────────────────────────────────────┘
```

## Decision Framework

```
┌──────────────────────────────────────────────────────────────────────────┐
│              BUILD vs BUY vs REUSE DECISION FRAMEWORK                    │
├──────────────────────────────────────────────────────────────────────────┤
│                                                                          │
│   CHOOSE BUILD WHEN:                                                     │
│   • Unique competitive advantage                                         │
│   • No suitable product exists                                           │
│   • Full control needed                                                  │
│   • Sensitive/proprietary logic                                          │
│                                                                          │
│   CHOOSE BUY WHEN:                                                       │
```

```
  • Standard functionality
  • Mature products available
  • Time-to-market critical
  • Cost-effective vs build

  CHOOSE REUSE WHEN:
  • Similar solution exists in org
  • Enterprise Continuum has assets
  • Can leverage existing investment
  • Minor customization needed
```

### Example Decisions

EXAMPLE BUILD vs BUY vs REUSE

| CAPABILITY | DECISION | REASON |
|---|---|---|
| Payment Gateway | BUY | Stripe/Adyen mature, PCI-ready |
| Player Management | BUILD | Unique business logic |
| CRM | BUY | Salesforce standard solution |
| Analytics Dashboard | REUSE | Existing BI platform available |
| Bonus Engine | BUILD | Competitive differentiator |
| Identity (SSO) | BUY | Okta/Auth0 standard solution |
| Data Lake | REUSE | Enterprise data platform exists |

---

## Phase E vs Phase F

```
              PHASE E vs PHASE F

  PHASE E: IDENTIFY & DECIDE
  • What work packages?
  • What projects?
  • Build or Buy?
  • What dependencies?
  • Initial roadmap

  PHASE F: PLAN IN DETAIL
  • Detailed timeline
  • Budget & resources
  • Transition states
  • Migration sequence
  • Architecture contracts
```

```
│   E = "WHAT to do"                                                       │
│   F = "HOW & WHEN to do it"                                              │
│                                                                          │
└──────────────────────────────────────────────────────────────────────────┘
```

## Key Deliverables

| Deliverable | Description |
|---|---|
| **Implementation and Migration Strategy** | High-level approach |
| **Work Package List** | All identified work packages |
| **Project Groupings** | How work packages form projects |
| **Dependency Analysis** | What depends on what |
| **Build/Buy/Reuse Decisions** | Solution approach for each gap |

## Summary

```
┌──────────────────────────────────────────────────────────────────────────┐
│                                                                          │
│   PHASE E = "IDENTIFY OPPORTUNITIES TO CLOSE GAPS"                       │
│                                                                          │
│   • Take gaps from B, C, D                                               │
│   • Create work packages                                                 │
│   • Group into projects                                                  │
│   • Analyze dependencies                                                 │
│   • Decide: Build vs Buy vs Reuse                                        │
│                                                                          │
│   OUTPUT: Implementation Strategy + Work Packages + Projects             │
│                                                                          │
