

ADM_Phases_Overview

TOGAF ADM Phases - Outcomes Overview

Quick reference for all ADM phases with key activities, deliverables, and outcomes

Summary Table

Phase	Name	Purpose	Key Activities	Key Deliverables
Preliminary	EA Setup	Setup EA capability (ONCE)	Define team, tools, principles, governance, standards	Organizational Model, Architecture Principles
A	Architecture Vision	Get approval to start	Identify stakeholders, confirm drivers, define scope, create vision	SOW, Architecture Vision Document
B	Business Architecture	Define business	Business flows, BPMN, org structure, capabilities	Business Architecture Document, Gap Analysis
C	Information Systems	Define data & apps	Data models, application portfolio, integrations	Data Architecture, Application Architecture
D	Technology Architecture	Define technology	Infrastructure, platforms, databases, tech stack	Technology Architecture Document
E	Opportunities & Solutions	Identify how to build	Work packages, dependencies, Build/Buy/Reuse	Implementation Strategy, Work Packages

Phase	Name	Purpose	Key Activities	Key Deliverables
F	Migration Planning	Plan the journey	Roadmap, budget, resources, contracts	Migration Plan, Architecture Contracts
G	Implementation Governance	Ensure compliance	Reviews, checklists, dispensations	Compliance Assessments, Governance Log
H	Change Management	Keep architecture alive	Monitor changes, manage ACRs, update docs	Architecture Updates, Change Requests

Detailed Phase Overview

ADM PHASES OVERVIEW				
PHASE	PURPOSE	KEY ACTIVITIES		KEY
DELIVERABLES				
PRELIMINARY Model for EA (One-time) Principles	Setup EA Capability	• Create EA team		• Organizational
		• Setup tools		• Architecture
		• Define principles		• Tailored Framework
Repository		• Establish governance		• Architecture
		• Define standards		
PHASE A Architecture	Get approval to start	• Identify stakeholders		• Statement of
Architecture		• Confirm business drivers		Work (SOW)

Vision Document		• Define scope	• Architecture Vision
		• Create vision	• Stakeholder Map
		• Assess readiness	• RACI Matrix
		• Get sign-off	• Communication Plan
PHASE B Architecture Document Business Models (BPMN) Architecture	Define how business works	• Baseline business arch	• Business
		• Target business arch	• Business Process
		• Gap analysis	• Organization Chart
		• Business flows	• Capability Map
		• BPMN diagrams	• Gap Analysis
Results		• Org structure	• Value Stream Maps
PHASE C Information Systems (Logical/Physical) Architecture	Define data and applications	DATA:	DATA:
		• Logical data models	• Data Architecture
		• Physical data models	• Data Models
		• Data flow diagrams	• Data Catalog
Architecture Doc Portfolio		APPLICATION:	APPLICATION:
		• App portfolio	• Application
		• App ↔ Business mapping	• Application
		• Integration patterns	• Interface Catalog
		• Gap analysis	• Gap Analysis
Results			

PHASE D	Define	• Define platforms	• Technology
Architecture Doc			
Technology	infrastructure	• Technology layers	• Platform
Decomposition			
Architecture		• App ↔ Tech mapping	• App/Technology
Matrix			
		• Gap analysis	• Technology
Standards			
			• Gap Analysis
Results			
		COVERS:	
		• Edge/Delivery layer	
		• Application layer	
		• Data layer	
		• Infrastructure layer	
		• Security & Ops	
PHASE E	Identify how	• Identify work packages	• Implementation
Strategy			
Opportunities	to implement	• Group into projects	• Work Package List
& Solutions		• Assess dependencies	• Project Groupings
		• Build vs Buy vs Reuse	• Dependency Matrix
		• Initial roadmap	• Build/Buy/Reuse
Decisions			
PHASE F	Plan the	• Finalize roadmap	• Implementation &
Migration			
Migration	transformation	• Finalize impl. plan	Plan

Planning Roadmap		• Define transitions	• Architecture
Architectures		• Budget & resources	• Transition
Contracts		• Business value tracking	• Architecture
Assessment		• Create contracts	• Business Value
PHASE G Assessments	Ensure teams	• Ensure conformance	• Compliance
Implementation Contracts	follow architecture	• Govern projects	• Architecture
Governance		• Compliance reviews	(enforced)
		• Create checklists	• Dispensation Log
		• Grant dispensations	• Governance Log
		• Report to leadership	• Recommendations
PHASE H Updates	Keep architecture	• Monitor tech changes	• Architecture
Architecture (ACRs)	current	• Monitor business changes	• Change Requests
Change Mgmt		• Manage change requests	• Governance Log
needed)		• Update architecture	• New ADM Cycle (if
		• Assess impact	
		• Trigger new cycle	
REQUIREMENTS Repository	Manage requirements	• Identify requirements	• Requirements

21/02/2026, 18:38

ADM_Phases_Overview

MANAGEMENT	throughout ADM	• Store requirements	• Traceability Matrix
(Central)		• Manage changes	• Impact Assessments
		• Ensure addressed	
		• Maintain traceability	

Phase Categories

PHASE CATEGORIES
SETUP (One-time): • Preliminary – EA Capability Setup INITIATION: • Phase A – Vision & Approval DESIGN (Architecture Domains): • Phase B – Business Architecture • Phase C – Data + Application Architecture • Phase D – Technology Architecture PLANNING: • Phase E – Opportunities & Solutions • Phase F – Migration Planning EXECUTION & GOVERNANCE: • Phase G – Implementation Governance • Phase H – Change Management CONTINUOUS: • Requirements Management (center of all phases)

Quick Reference - One Line Per Phase

Phase	One-Line Summary
Preliminary	Setup EA team, tools, principles, governance, standards (ONCE)
A	Get approval: SOW + Architecture Vision
B	Business flows, BPMN, org structure, capabilities
C	Data models + Application portfolio
D	Technology stack (infra, languages, databases)
E	Work packages + Build/Buy + Dependencies
F	Budget + Resources + Roadmap + Contracts
G	Checklist + Reviews + Compliance
H	Change requests + Architecture updates
Req Mgmt	Requirements throughout all phases

Deliverables by Category

Documents

Phase	Documents
A	Statement of Architecture Work (SOW), Architecture Vision Document
B	Business Architecture Document
C	Data Architecture Document, Application Architecture Document
D	Technology Architecture Document
F	Implementation & Migration Plan

Diagrams/Models

Phase	Diagrams
B	BPMN Process Flows, Org Chart, Capability Map, Value Streams

Phase	Diagrams
C	Data Models (Logical/Physical), Application Portfolio, Integration Diagrams
D	Platform Decomposition, Technology Layers
F	Architecture Roadmap, Transition Architectures

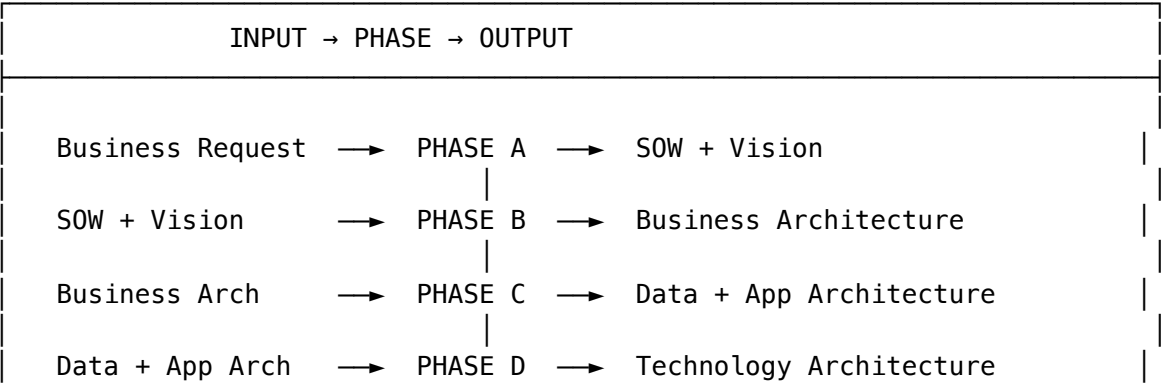

Catalogs/Matrices

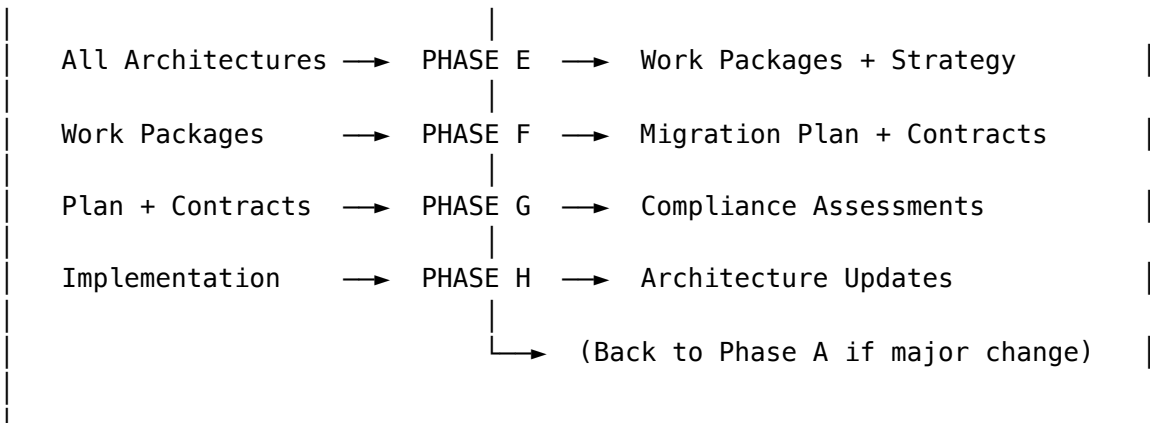

Phase	Catalogs/Matrices
A	Stakeholder Map, RACI Matrix, Concerns Matrix
C	Data Catalog, Interface Catalog, App/Function Matrix
D	App/Technology Matrix, Technology Standards Catalog
E	Dependency Matrix, Work Package List
G	Compliance Checklist, Dispensation Log

Governance Artifacts

Phase	Governance Artifacts
F	Architecture Contracts
G	Compliance Assessments, Governance Log
H	Architecture Change Requests (ACRs)

Phase Input/Output Flow

Memory Aid - Keywords

MEMORY AID	
PRELIMINARY = SETUP (Team, Tools, Principles, Governance, Standards)	
A = APPROVE	(Vision, SOW, Stakeholders, Scope)
B = BUSINESS	(Flows, BPMN, Org, Capabilities)
C = CONTENT	(Data models, App portfolio)
D = DEVICES	(Technology, Infra, Platforms)
E = EXPLORE	(Work packages, Build/Buy, Dependencies)
F = FINALIZE	(Budget, Resources, Roadmap, Contracts)
G = GOVERN	(Reviews, Checklists, Compliance)
H = HANDLE	(Changes, ACRs, Updates)
REQ MGMT = REQUIREMENTS (Throughout all phases)	

Interview Quick Answer

*"TOGAF ADM starts with **Phase A** where we create the Architecture Vision and get approval through SOW. Then we design in **Phases B, C, D** - Business, Data/Application, and Technology architectures. In **Phase E** we identify work packages and Build/Buy decisions. **Phase F** creates the detailed migration plan with budget and contracts. **Phase G** governs implementation through compliance reviews. **Phase H** manages ongoing changes. Requirements Management runs throughout all phases as the central hub."*
